01 — SELECTED WORK

Three cases that show *what we ship*.

All work —

01 / FINTECH

2026

Marketing rebuild
for a fintech

NEXT.JS · POSTGRES · TAILWIND

Marketing rebuild for a fintech

Cut LCP from 4.1s to 1.6s and lifted lead conversion 47% on the same content.

Read case →

02 / MOBILE

2026

S + Android
in a single sprint.

Shipping May 2026

SWIFTUI · REACT NATIVE · EXPO

Mobile app for a YC-backed startup

iOS + Android shipped in a single sprint. SwiftUI + React Native.

03 / AI

2026

Practical RAG
for 1.2M documents.

Shipping May 2026

OPENAI · PGVECTOR · EMBEDDINGS

AI search for an enterprise dataset

Practical RAG over 1.2M documents. Sub-200ms response, source-cited.

ANTHROPIC

STRIPE

Some clients are NDA-bound. Real logos drop in here as releases ship.

02 — CAPABILITIES

What we ship,*end to end.*

One studio. Four capabilities. Pick any combination.

01

Web platforms

Next.js · Postgres · Tailwind

We rebuild slow marketing sites and ship product MVPs. Lighthouse 95+ by default.

02

Mobile

SwiftUI · React Native · Expo

iOS + Android in a single sprint. Native where it matters, cross-platform where it ships faster.

03

AI integration

OpenAI · embeddings · RAG

Practical AI features in production code, not demos. Search, summarisation, agents on your data.

04

Performance & rebuilds

Lighthouse 95+ · Core Web Vitals · Audits

Existing-stack rebuilds, perf audits, and incremental migrations from monoliths.

03 — HOW WE WORK

From kickoff to

ship *in 4-8 weeks.*

One sprint per phase. No status reports. No invoices for setup calls.

Step 01 · 1 week

Brief

We listen, scope, and price-fix. You leave the kickoff with a one-page proposal — not a 40-slide deck.

- Scope · price · timeline locked
- Risk assessment
- Tech stack agreed

01

N

02

Step 02 · 1-2 weeks

Design

Mockups, prototype, sign-off. Real Figma files you keep, not screenshots.

- Hi-fi mockups
- Interactive prototype
- Component library

Step 03 · 2-4 weeks

Build

Daily Looms, weekly demos. You see progress every 24h, not at milestone gates.

- Daily progress recordings
- Staging environment
- CI/CD set up

03

N

04

Step 04 · week N+1

Ship

Production deploy, monitoring, hand-off documentation. We stay on retainer if you want it.

- Production deployment
- Monitoring + alerts
- Runbook + ownership transfer
